

REPRODUCTIVE HEALTH TOOLKIT FOR URBAN REFUGEES

Henia Dakkak

Developed Jointly

In 2015

WHY?

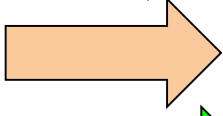

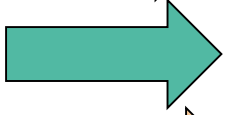

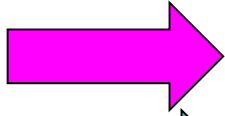

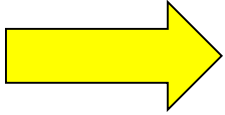

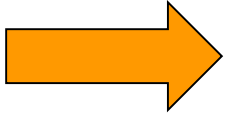

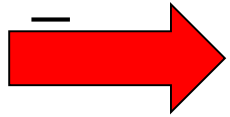

Today, an estimated 6 in 10
refugees live in cities,
not in refugee camps

The toolkit comprises complementary tools that focus on

1. Decision-making
2. Analysis
3. Mapping of health facilities and services
4. Planning, monitoring and evaluation
5. Advocacy
6. Coordination
7. Community mobilization
8. Options for the provision of healthcare

It guides users through a decision-making process to:

- Assess the situation
 - Determine priority issues and vulnerable groups
 - Create an action plan
-

1	Assessment Tools
